

RK UNIVERSITY
School Of Engineering
(SEP. – 2025)
Semester – 5

Date: 9-9-2025

Subject Name: Enterprise Computing through .NET Framework

Branch: CE/IT

Subject code: CE535

Answer Sheet

Division: CE - C

Exam Time: 2:25 – 4:15 PM

SET: DEMO

Enrollment No: 24SOECE13901

Name: Saurav Pandit

Roll No: 54

Instructions to Candidates:

1. Please fill Division, Exam Time, Set of Paper, Enrollment No., Name & Roll No.
2. You will save this file & upload your saved file with the file name is {rollno_enrollmentNo_name_Answersheet}.
3. This assessment is intended to test the hands on skills related C# Programming.
4. You must take screenshot of output and write code of each task solution.
5. Both screenshot and code (each task solution) must contain your Enrollment and Name.

Task_1 Ans.	<pre>using System; using System.Collections.Generic; using System.Linq; using System.Text; using System.Threading.Tasks; namespace _24SOECE13901_Saurav_Pandit_DEMO_TEST { internal class Q1 { public static void Main(string[] args) { for (int i = 5; i >= 1; i--) { for (int j = 1; j <= i; j++) { Console.Write("* "); } Console.WriteLine(); } } } }</pre> Output :
----------------	---

	<pre> D:\RKU\5th SEM\ .NET and C#\24SOECE13901_Saurav_Pandit_DEMO_TEST>Q1 * * * * * * * * * * * * * * * </pre>
Task_2 Ans.	<pre> using System; using System.Collections.Generic; using System.Linq; using System.Text; using System.Threading.Tasks; namespace _24SOECE13901_Saurav_Pandit_DEMO_TEST { internal class Q2 { public static void Main(string[] args) { Console.WriteLine("Enter the number of elements: "); int n = Convert.ToInt32(Console.ReadLine()); int[] arr = new int[n]; Console.WriteLine("Enter the elements:"); for (int i = 0; i < n; i++) { arr[i] = Convert.ToInt32(Console.ReadLine()); } Console.WriteLine("\nOriginal Array:"); for (int i = 0; i < n; i++) { Console.Write(arr[i] + " "); } // reverse order (without using built-in functions) Console.WriteLine("\n\nArray in Reverse Order:"); for (int i = n - 1; i >= 0; i--) { Console.Write(arr[i] + " "); } } } } </pre> Output : <pre> D:\RKU\5th SEM\ .NET and C#\24SOECE13901_Saurav_Pandit_DEMO_TEST>Q2 Enter the number of elements: 4 Enter the elements: 11 12 13 14 </pre>

Task_3

Ans.

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace _24SOECE13901_Saurav_Pandit_DEMO_TEST
{
    class Employee
    {
        public int id;
        public string name;
        public double salary;

        public void Display()
        {
            Console.WriteLine("ID is : " + id);
            Console.WriteLine("Name is : " + name);
            Console.WriteLine("Salary is : " + salary);
            Console.WriteLine("-----");
        }
    }
    internal class Q3
    {
        public static void Main(string[] args)
        {
            Employee emp = new Employee();
            emp.id = 101;
            emp.name = "Saurav";
            emp.salary = 25000.00;
            emp.Display();

            Employee em = new Employee();
            em.id = 102;
            em.name = "Shubham";
            em.salary = 350000;
            em.Display();
        }
    }
}
```

Output :

```
D:\RKU\5th SEM\ .NET and C#\24SOECE13901_Saurav_Pandit_DEMO_TEST>Q3
ID is : 101
Name is : Saurav
Salary is : 25000
-----
ID is : 102
Name is : Shubham
Salary is : 350000
-----
```

Task_4

Ans.

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Data.SqlClient;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;
using static System.Windows.Forms.VisualStyles.VisualStyleElement;

namespace _24SOECE13901_Saurav_Pandit_DEMO_TEST__Windoes_Form_
{
    public partial class Form1 : Form
    {
        string connectionstring = "Data Source=(localdb)\\MSSQLLocalDB;Initial
Catalog=demo;Integrated Security=True;Connect
Timeout=30;Encrypt=False;Trusted_Connection = True";

        public Form1()
        {
            InitializeComponent();
        }

        private void button1_Click(object sender, EventArgs e)
        {
            SqlConnection con = new SqlConnection(connectionstring);
            con.Open();

            string query = "insert into str values('" + textBox1.Text + "','" +
textBox2.Text + "','" + textBox3.Text + "')";
            SqlCommand cmd = new SqlCommand(query, con);
            cmd.ExecuteNonQuery();

            con.Close();
            MessageBox.Show("Register Successfully");
        }
    }
}
```

Output :

The screenshot shows a Windows application window titled "24SOECE13901". Inside the window, there are three text input fields: "Enrollment No : 24SOECE13901", "Name : Saurav", and "Semester : 5". Below these fields is a "Save" button. A small dialog box is open in the foreground with the text "Register Successfully" and an "OK" button.

Task_5
Ans.

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;

namespace _24SOECE13901_Saurav_Pandit_DEMO_TEST__Windoos_Form_
{
    public partial class Form2 : Form
    {
        public Form2()
        {
            InitializeComponent();
        }

        private void btn_sort_Click(object sender, EventArgs e)
        {
            listBox1.Sorted = true;
        }

        private void btn_fill_Click(object sender, EventArgs e)
        {
            listBox1.Items.Add("Hello Saurav");
            listBox1.Items.Add("Hello Bhumi Mam");
            listBox1.Items.Add("Razz");
            listBox1.Items.Add("Rahul Bhai");
            listBox1.Items.Add("Mohin");
        }
    }
}
```

```
private void btn_clear_Click(object sender, EventArgs e)
{
    listBox1.Items.Clear();
}

private void btn_remove_Click(object sender, EventArgs e)
{
    if (listBox1.SelectedItem != null)
    {
        listBox1.Items.Remove(listBox1.SelectedItem);
    }
    else
    {
        MessageBox.Show("Please select an item to remove.");
    }
}

private void btn_count_Click(object sender, EventArgs e)
{
    int total = listBox1.Items.Count;
    label1.Text = "Total Items: " + total;
}

private void listBox1_SelectedIndexChanged(object sender, EventArgs e)
{
    if (listBox1.SelectedItem != null)
    {
        label2.Text = "Your Selection: " + listBox1.SelectedItem.ToString();
    }
}
}
```

Output :
